**Connector plug: ¼ inch phone plug, mono, right angled**

**Universal operation: Three terminals- common, opened, closed**

**Description:** The PS-901/700 is an industrial grade, momentary contact cord switch. The lightweight but large assembly is an ideal signaling device for hearing test responses, VRA/COR/TROCA activation, traffic signal control, visual presentation scrolling and any place where remote activation is required. The adult-sized diameter permits long periods of use without hand muscle cramping and is very agreeable to arthritic hands common in geriatric populations. Furthermore, the high quality button assembly will perform flawless even when the operator is insulated with gloves. Custom cord lengths and plug connectors are readily adaptable and available.

**Warranty: One year on parts.**

**F.O.B. Columbus, Ohio**
